

To whom it may concern,

My experience with Convey Communications was a welcomed one. My company moved locations and due to extenuating circumstances the decision on cabling our new location was delayed and a last minute decision was made. Convey took on the project with only 2 weeks to complete 130 dual drops of which 96 were in a very confined cable channel embedded in concrete slab. But they managed to pull off the feat and we were open for business as planned, with a very clean and reliable cable installation.

Thanks Kirk and Convey Team,
